PROJECTS

JIT Institute Website - Live

Developed responsive eLearing web app based on figma design with Next js, Tailwind and server with Express and MySql2. Implemented local payment, authentication, Protected routing and deployed in Cloudways.

CouponThemes Website - Live

It's a theme company website for my previous workplace. Worked with the dev team to develop the pages from a figma design using Generatepress theme and do speed optimization. Used Gutenberg, CF7, Yoast Seo and WP rocket.

Wites & Rogers Lawyer Firm - Live

Custom developed wordpress theme for a law firm. Created page templates with php, bootstrap and custom css that designed the page and the landing pages. Used plugins like CPT, ACF, CF7, Yoast SEO and WP Rocket.

Scan2Archive Business Website - Live

Custom designed document management buiness website . Figma to wordpress Using Enfold theme. The job is to create the exact same design as the figma file. Customized all pages and added custom CSS to ensure exact design.
